# nektony

# Senior macOS Developer

The Nektony company is looking for a creative macOS developer to join our team on a full-time basis and help us build useful applications for macOS. We are a software development company specializing in cleanup tools for Mac and iPhone and our apps get the highest ratings from our users. If you want to be a part of our team, share your skills, as well as learn more, we are looking for you.

## Responsibilities:
- interface and core product components development;
- algorithms development;
- skills to document source code;
- working in a team.

## Requirements:
- demonstrated technical strengths in Objective-C and SWIFT (Xcode) for more than 1 year;
- strong knowledge of macOS architecture;
- experience in working with version control systems(understanding of GitFlow);
- skills to solve problems in accordance with the architecture of the project;
- skills to document source code;
- strong tasks estimation skill;
- result-oriented approach;
- knowledge of English sufficient to work with documentation and write expressive code.

## Would be a plus:
- experience with C/C++;
- experience in writing unit tests and TDD technique;
- practical skills in working with Git repositories (SourceTree, SmartGit);
- being able to work in team projects;
- experience in delivering new products;
- MS or BS in Computer Science;
- practical experience with Apple products (Mac, iPad, iPhone);
- internal desire to search for newer solutions to reduce costs and improve user experience.

## We offer:

- a friendly team of professionals;
- a high salary that matches your experience and interview results;
- great opportunity for professional and career growth;
- annual paid vacations (24 days).

## Briefly about us:

Nektony is a product development company that creates cleanup applications for macOS and iOS platforms. Our mission is to help Mac and iPhone users to optimize their devices' performance and clean up storage from unwanted content. We've been working since 2011. Some of our products are among the top 10 best apps according to popular digital media.
