

Duplicates Finder released for Mac OS X - Find and Delete All Duplicates

December 03, 2015

Nektony today introduces Duplicates Finder 3.0.6, their new freeware utility to find any duplicate file on Mac OS X. Duplicates Finder was specifically developed to help anyone find and delete all duplicate files en masse. Files are categorized by types for images, videos, music, archives, documents, and all other specific extensions. Every found file is displayed in a corresponding category with its location on the hard drive, a quick link to the Finder, as well with file preview.

Odesa, Ukraine - Nektony today is happy to announce the release of Duplicates Finder 3.0.6, their new freeware utility to find any duplicate file on Mac OS X. Duplicates Finder was specifically developed to help anyone find and delete all duplicate files en masse. Files are categorized by types for images, videos, music, archives, documents, and all other specific extensions. Every found file is displayed in a corresponding category with its location on an HD, quick link to Finder, as well with file preview.

Duplicate Finder can scan the whole drive at a time or as many separate folders as the user has selected. It is also possible to specify folders, files, and extensions that should be skipped from search. This handy feature is very useful, such as when the user has corporate cloud storage or the special folder where all their sensitive content is stored.

To start scanning, add the whole drive from the Finder menu, or simply Drag & Drop as a group of folders and click Enter. After a few minutes, users will get clear results where they can explore files by subcategory. Select duplicate files with the help of a preview window and specified file location (see screenshot). When all files are selected, simply click "Remove." While scanning, Duplicate Finder will also automatically delete empty folders.

Scanning:

- * Fast scanning algorithm
- * Scanning for duplicates in multiple folders or drives
- * External drives and mounted network folders support
- * "Recents" for scanned folders
- * Animated scanning process
- * Skip list for various files & folders
- * Option scan hidden folders

Results Overview:

- * Visual chart reports
- * Fast cleanup recommendations
- * Built-in help tips

Duplicates:

- * Duplicates by file types
- * Built-in duplicates search
- * Preview & Quick Look for every file
- * Sort duplicates (by name, size, total size, type, duplicates count)

Removing:

- * Visual progress bar of selected files for removal
- * One-click selection of multiple duplicate files

- 
- * Smart duplicates autoselection
 - * "Always Select" and "Never Select" autoselect options
 - * Confirmation list of deleted files
 - * Moving to Trash or permanent removal option

Users can change their reports by altering minimum duplicates' size, using Skip lists for specific files, folders, extensions, and more. Duplicates Finder is full of great features that speed up and simplify scanning process: sorting by size, a number of duplicates, total size, date, and name, multi-items scan, skip-lists for files, folders and extensions, customizable scanning size, quick search, and quick view. It's possible to make auto select smarter by pre-defining select and newer select lists. The app scans all types of drives supported by Mac OS X.

System Requirements:

- * OS X 10.9 or later
- * 64-bit processor
- * 7.9 MB

Pricing and Availability:

Duplicates Finder 3.0.6 is Free and available worldwide through the Mac App Store in the Utilities category. Delete all your duplicate files with the most advanced duplicates finder tool for Mac.
